Automotive Shelving & Tire Racks

Automotive Shelving is specifically designed for efficiently storing automotive parts. Shelves can be reconfigured easily by simply sliding out from the front and repositioning in 1½" increments without tools, clips or extra hardware. Each unit can be customized to create individual spaces or use handy bin boxes for small or loose parts. Use solid end panels for a smooth, finished appearance. *Z-Line Tire Rack* conveniently stores tires for easy access and display. Uses vertical height to maximize available floor space. Tool & Die Rack

For extra heavy-duty storage, Tennsco's *Heavy Duty Reinforced Shelving* offers a shelf capacity of 4,000 lbs. Constructed of 16-gauge steel shelves and 14-gauge posts and supports, the unit's superior strength makes it perfect for storing dies, motors, jigs, fixtures and other heavy materials. Braceless construction allows easy access from all four sides, and the smooth steel surface makes placing and removing items much easier than on wood or wire shelves - simply slide items on and off. A simple design, uncommon for a unit built to withstand such loads, makes it quick and easy to assemble or rearrange.
